SRI180	Sanding sheet roll Infinity 70mm x 12m – P180
SRI240	Sanding sheet roll Infinity 70mm x 12m – P240
SRI320	Sanding sheet roll Infinity 70mm x 12m – P320
SRI400	Sanding sheet roll Infinity 70mm x 12m – P400

DESCRIPTION

Enhance your automotive repair process with the Infinity roll of sanding paper, carefully developed for superior cutting performance and longer life. With ceramic grit and a strategically designed multi-hole pattern for efficient dust extraction, this roll of sandpaper is your ideal solution for use in automotive repair, wood sanding, bare metal sanding, priming, intermediate layers of paint and on solid countertops. The Gerko Infinity sanding paper stands for quality, a sanding paper you can use indefinitely with the best results as follows.

TECHNICAL SPECIFICATIONS

Roll format - sheet format	70mm x 12m - 70mm x 70mm
Grain	Ceramic
Backing	C-wt Paper + Hook and Loop system
Coating	Open coat
Bond	Resin over Resin
Perforation	Chevron multi-hole pattern
Color	Purple

SANDING SHEET ROLL INFINITY

FEATURES

Ceramic Minerals – Durable and Long Lasting:

The sanding sheet roll is infused with ceramic minerals, ensuring durability and a prolonged lifespan, making it a reliable choice for key stages in auto body repair. BRV9 Purple Ceramic Rolls

Hook-and-loop – Easy to Changeover:

The hook-and-loop design facilitates quick and easy changeovers, enhancing efficiency during your workflow.

Chevron Multi-Holes for Dust Extraction:

The strategically designed chevron multi-holes ensure superior dust extraction, maintaining a cleaner working environment and prolonging the life of the sanding sheet.

Pre-cut for easy tear-off:

The pre-cut feature allows for easy sizing, providing convenience and precision in handling the sanding sheet according to your specific needs. Can be used on sanding blocks 70x125mm, 70x198mm and 70x420mm, requiring minimal stock.

Anti-Clogging:

With an anti-clogging coating, the sanding sheet roll minimizes disruptions during use, allowing for a smooth and uninterrupted sanding process.

1. Size coat

2. Mineral grit

3. Glue or resin bond

4. Backing

Ceramic grain can be selfsharpening, the grains keep sharp during the life time. It cuts faster, lasts longer than other grains.

SANDING SHEET ROLL INFINITY

APPLICATIONS

Gerko sanding sheet roll Infinity is ideal for a variety of applications, including:

Metal

Perfect for precise metalwork during auto body repair.

Wood

Suitable for shaping and smoothing wood surfaces with finesse.

Paint

Efficiently removes paint layers, preparing surfaces for refinishing.

Putty

Ideal for shaping and refining body filler, ensuring a smooth finish.
