

MATTING COMPOUND

GENERAL

CODE	DESCRIPTION
MC1	Matting compound 1KG

DESCRIPTION

Gerko matting compound is a combination of chemical liquids and abrasives. It is used in preparation for spray painting and is specially developed to mattify automotive paints. This paste allows surfaces to be prepared for spraying or application of a basecoat or clearcoat.

FEATURES

- Removes all traces of wax, grease and silicone and at the same time provides matt surface, all in one action
- Used in combination with Gerko scuff rolls SB01 and SB02, which leads to a clear improvement of the sanding and matting effect
- Water-based product
- Easy to use

Gerko matting compound is a water-based matting agent that is completely silicone-free. This makes the paste extremely suitable for use in professional bodyshops. Thanks to the water base, the matting paste is easy to remove with water-based degreaser WD05/ WD25.
