SCB400	Sanding strips blue ceramic 70 x 198mm - P400 (50pcs.)

DESCRIPTION

Experience unmatched sanding performance with our blue ceramic sanding strips. Made with premium grit, a robust resin bond and a special steared coating, these sanding strips deliver superior performance and extended life. Designed for a wide range of applications, Blue Ceramic sanding strips offer reliability and efficiency in a variety of sanding projects.

TECHNICAL SPECIFICATIONS

Size - Perforation - Color	70 x 198 mm - 8 Holes - Blue
Grain	Ceramic aluminium oxide beads
Backing	C-wt paper
Coating	Half-open coat
Bond	Resin over Resin

SANDING STRIPS BLUE CERAMIC 70 X 198 MM

FEATURES

Premium Grain:

Blue ceramic sanding strips are made with premium grain, ensuring optimal cutting performance and durability.

Strong Resin Bond:

The strips feature a strong resin bond that enhances their overall strength and resilience, contributing to a longer lifespan.

Special Stearated Coating:

Equipped with a special stearated coating, these strips offer superior performance and reduce the risk of clogging, ensuring consistent results throughout use.

1. Size coat

2. Mineral grit

3. Glue or resin bond

4. Backing

Ceramic grain can be selfsharpening, the grains keep sharp during the life time. It cuts faster, lasts longer than other grains.

APPLICATIONS

Gerko sanding strips blue ceramic is ideal for a variety of applications, including:

Metal

Perfect for precise metalwork during auto body repair.

Wood

Suitable for shaping and smoothing wood surfaces with finesse.

Paint

Efficiently removes paint layers, preparing surfaces for refinishing.

Putty

Ideal for shaping and refining body filler, ensuring a smooth finish.
