DESCRIPTION

Gerko wet and dry sanding sheets are high-quality abrasives sized 230 x 280 mm. They feature a silicon carbide abrasive mineral and are suitable for both dry and wet sanding of automotive paints, lacquers, clear coats, and various other surfaces. Thanks to their water-resistant backing, the sheets can be used with water or degreaser without tearing. Their consistent quality ensures a sharp, even cutting action and a professional sanding result.

FEATURES

- Can be used both dry and wet
- Silicon carbide abrasive grit
- Easily removes scratches from painted parts
- Optimal sanding quality
- Very smooth finish

WET & DRY SANDING SHEETS
