

ELECTRIC SANDING MACHINE Ø150

GENERAL

CODE	DESCRIPTION
ESM05	Electric sanding machine ø150

DESCRIPTION

Gerko electric sander with a 150 mm backing pad, 5 mm orbit and a 350 W brushless motor. Suitable for both coarse and fine sanding and usable on wood, metal, plastics and various coatings such as paint, clearcoat, primer, filler and undercoat.

The speed control (4,000–10,000 rpm) allows you to precisely match the speed to the material and the desired finish. For low-dust sanding, it features a dust extraction connection with a universal 29 mm adapter, compatible with a Multihole backing pad for improved dust removal and longer pad life.

Thanks to the ergonomic design with soft rubber grip areas, low weight (1.1 kg) and long power cable, you work comfortably with excellent control and freedom of movement.

FEATURES

- Powerful performance (350 W)
- Suitable for sanding hard-to-reach areas due to its compact shape
- Lightweight sander (1 kg)
- Sander without transformer
- Standard 5 m cable
- Brushless motor
- Features a soft start function
- Energy Saving
- Constant speed, even under heavy load
- Staged speed control
- Deviation of 5 mm

SPECIFICATIONS

Model	Electric, ø150
Speed - rpm	4.000 en 10.000 rpm
Wattage	350 Watt
Sanding pad	Velcro
Sanding stroke	5mm
Noise level	220-240V~,50Hz
