

2K ACCELERATING

GENERAL

CODE	DESCRIPTION
AA05	2K accelerating 500 ml

DESCRIPTION

Gerko accelerator is a fully professional accelerator of the curing and drying processes of two-component polyurethane and acrylic products. Should be used in an amount of 1-2% of the total weight of the varnish and hardener. Do not increase the ratio as this may lead to cracking and excessive gloss loss of clearcoat.

USAGE

Use as additive for paints and varnishes accelerating the process of hardening of varnish, shortening varnishing processes.

MIXING RATIO

Should be used in an amount of 1-2% of the total weight of the varnish and hardener. Do not increase the proportion because this may result in cracking and excessive loss of gloss of clearcoat, with the loss of adhesion of paint to the ground.

STORAGE TIME AND CONDITIONS

Store in tightly closed containers, in a cool, dry place away from sources of fire and heat. Avoid exposure to sunlight. Expiration date: 12 months from date of manufacture - date on the top of container.

HEALTH AND SAFETY REGULATIONS

See Safety Data Sheet of the product.

SPECIFIC WEIGHT

About 0,9 g/cm³
