

## FOAM PAD ORANGE

### GENERAL

CODE	DESCRIPTION
<b>POL10</b>	Foam pad orange ø150
<b>POL50</b>	Foam pad orange ø80

### DESCRIPTION

The orange foam polishing pad is designed to correct light to medium paint defects. Its foam structure provides effective performance while maintaining a clean finish. Suitable for removing swirl marks, light scratches, oxidation, and other surface imperfections on painted substrates. When used with a suitable polishing compound, this pad delivers an even, glossy result.

### FEATURES

- For hard jobs
- To touch up small scratches and imperfections in the paint
- Open structure
- Removes swirl marks, light scratches, and oxidation
- Clean and even final finish
- Good control during polishing
- Versatile across different polishing steps
- Supports a fast and professional end result
