

WHEEL RIM HOLDER

GENERAL

CODE	DESCRIPTION
WRH	Wheel rim holder

DESCRIPTION

A wheel stand is a practical tool used to hold wheels securely and stably during cleaning, sanding, masking, priming and painting. Its design allows easy access to the entire wheel for efficient all-round processing.

PROPERTIES

- Stable support during all work stages
- Optimal access to the entire wheel
- Easy rotation for efficient processing
- Supports even primer and paint application
- Reduces the risk of contact damage or deformation
- Increases working speed and efficiency
- Promotes an ergonomic working position
- Suitable for preparation, repair and finishing operations
- To be used with Gerko portal rotating panel stand
