

REFILL DUST NEEDLES

GENERAL

CODE	DESCRIPTION
RDN10	Refill dust needles

DESCRIPTION

Refill set of dust needles for the precise removal of dust inclusions and small imperfections on painted surfaces. Ideal for use in body repair during paint correction and for achieving a clean, professional finish.

PROPERTIES

- For removing dust inclusions from paint layers
- Suitable for localized correction of minor paint defects
- Fine needle points for precise working
- Applicable on painted surfaces
- Suitable for preparatory finishing work before polishing
- Simple and controlled to use
- Developed for professional use in automotive refinishing
- Individually packed in a blister pack of 10 pieces

INSTRUCTIONS FOR USE

- Ensure the paint layer is fully cured
- Locate the dust inclusion
- Carefully remove the dust particle using the dust needle
- Work with light, controlled pressure
- Finish the surface further if necessary by sanding and polishing
