

MIXING CUP DISPENSERSET

GENERAL

CODE	DESCRIPTION
MXSET	Mixing cup dispenserset

DESCRIPTION

The dispenser set for mixing cups is a practical and space-saving solution for the organized storage and easy accessibility of mixing cups in the workshop. The system is designed for wall mounting and allows mixing cups of different volumes to be stored neatly and dispensed easily one by one during daily operations.

This dispenser is particularly suitable for use in body shops, spray booths, paint preparation areas, and other professional environments where efficiency, cleanliness, and speed are essential. Thanks to its sturdy construction and functional design, the system helps optimize the workspace and protects cups against contamination or damage.

APPLICATIONS

- Storage of mixing cups in professional workshops
- Quick and organized access to cups during mixing and painting operations
- Use in automotive body repair shops
- Use in paint preparation areas
- Use in industrial spraying and mixing environments

FEATURES

- Suitable for mixing cups of 385 ml, 750 ml, 1400 ml, and 2300 ml
- Wall-mounted design for optimal use of available workspace
- Clear and tidy organization of different cup sizes
- Easy and quick dispensing of individual cups
- Robust construction for professional and intensive use
- Helps keep mixing cups clean and protected during storage
- Improves efficiency and order in the workplace
- Suitable for use in paint and preparation areas

ADVANTAGES

- Saves workspace through vertical wall storage
- Ensures an organized and professional workshop environment
- Reduces clutter and loose cup storage
- Speeds up the workflow by keeping cups immediately accessible
- Reduces the risk of cup deformation or contamination
- Supports an efficient workflow in busy working environments
- Suitable for multiple cup sizes within one working area
